- Top 10 Global CEH Master
- Distinguished IIT Alumnus
- Mentored 1000+ Aspiring Developers
- Founder & Multi-Venture CTO

Master Full Stack with Our AI-Powered Curriculum

Explore each phase of Full Stack with structured, expert-led modules and AI-tools.

Enroll

Learn HTML

- Build the core web structure.
- Master semantic tags for SEO.
- Create accessible web content.
- Lay the foundation for styling.

Learn CSS

- Style beautiful user interfaces.
- Master layouts and responsiveness.
- Apply colors and custom fonts.
- Create smooth visual effects

Learn Tailwind CSS

- Build rapid custom interfaces.
- Master utility-first styling workflows.
- Design mobile-first responsive apps.
- Eliminate bloated CSS files.

JS Foundation

- Master core programming logic.
- Control dynamic web behavior.
- Handle data and variables.
- Build interactive site features.

JS OOPs

- Write reusable, modular code.
- Master classes and inheritance.
- Manage complex data structures.
- Build scalable app logic.

JS in Browser DOM

- Manipulate web elements live.
- Handle user click events.
- Update content without reloading.
- Create fluid user experiences.

Advanced JS

- Master asynchronous programming patterns.
- Handle complex API integrations.
- Optimize performance and memory.
- Use modern ES6+ features.

Git & GitHub

- Track code versions efficiently.
- Collaborate with global teams.
- Manage repositories and branches.
- Deploy projects to production.

Node.js Backend

- Build fast, scalable servers.
- Manage server-side logic efficiently.
- Handle file systems and databases.
- Power real-time web applications.

Intro to Databases

- Store and organize app data.
- Understand relational vs. non-relational.
- Master data security basics.
- Ensure high-speed data retrieval.

MongoDB

- Store flexible JSON-like data.
- Scale applications effortlessly.
- Query large datasets rapidly.
- Master NoSQL document modeling.

MongoDB Aggregation Pipeline

- Group and summarize datasets.
- Perform multi-stage data shifts.
- Calculate averages and totals.
- Reshape data for applications.

Next.js

- Build SEO-friendly web apps.
- Master server-side rendering (SSR).
- Optimize performance and speed.
- Deploy production-ready react sites.

Full Stack App with Auth & DB

- Secure user login and signup.
- Connect frontend to live databases.
- Manage user sessions and tokens.
- Build protected, private dashboard routes.

Deployment

- Launch apps to live servers.
- Configure custom domain names.
- Automate hosting and updates.
- Ensure 24/7 site availability.

Hands-on Live Projects

1. LMS Site + Auth + Payment
 - Build secure student portals.
 - Integrate Razorpay/Stripe gateways.
 - Manage course progress tracking.
 - Role-based access for users.
2. AI-Powered Code Editor
 - Build real-time code execution.
 - Integrate AI for auto-completion.
 - Master cloud-based file storage.
 - Create sleek developer interfaces.

Master Industry-Standard Tools

Gain hands-on expertise with the exact tech stack used by top-tier engineering teams.
